

Blogging with WebAppGear CMS

I. What is WebAppGear CMS

WebAppgear CMS is a Content Management System Plugin with Single Page Application style website. With WebAppGear CMS, you can managed your content and make your Web Application to be a Forum, Group Chat, Photo Gallery, Ticketing System, News Portal, Blog, Wiki and Live Chat with your customer. It's flexible CMS you can configure by your self without coding.

WebAppGear CMS managed the content in tree Hiararki, each content can have many sub contains. We call it a "Level". This screen below shows how WebAppGear CMS managed the content. We recommend to have at least 5 level of structure hiararki. Some features only works if you have 5 level of structured, like Latest content, Trending Topics, and Pinned content.

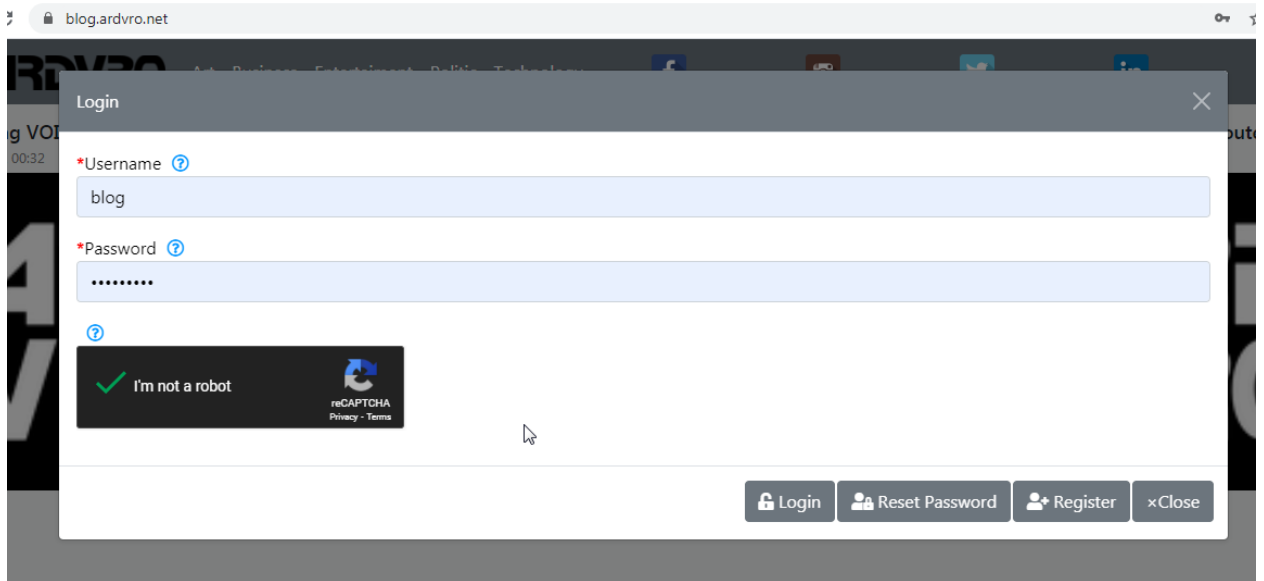

Features:

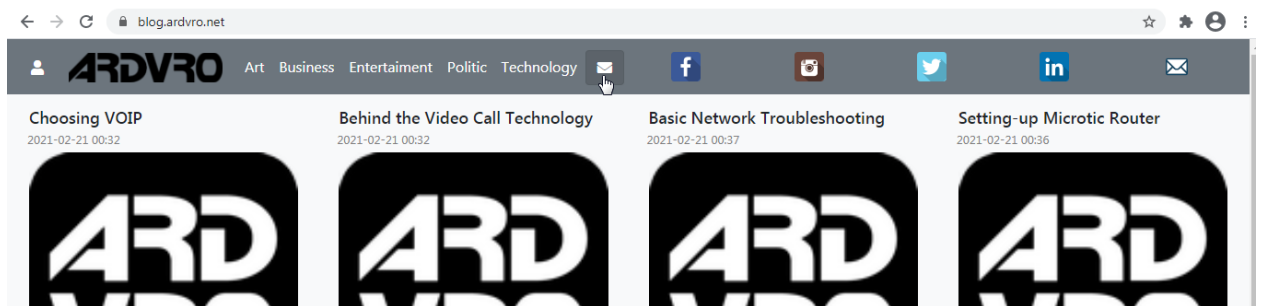

- Live Chat.
- Member Management and Roles.

II. Create and Managed Content.

1. Login to your new website that your created with WebAppGear.

2. After you login, click the Mail Icon on the Header.

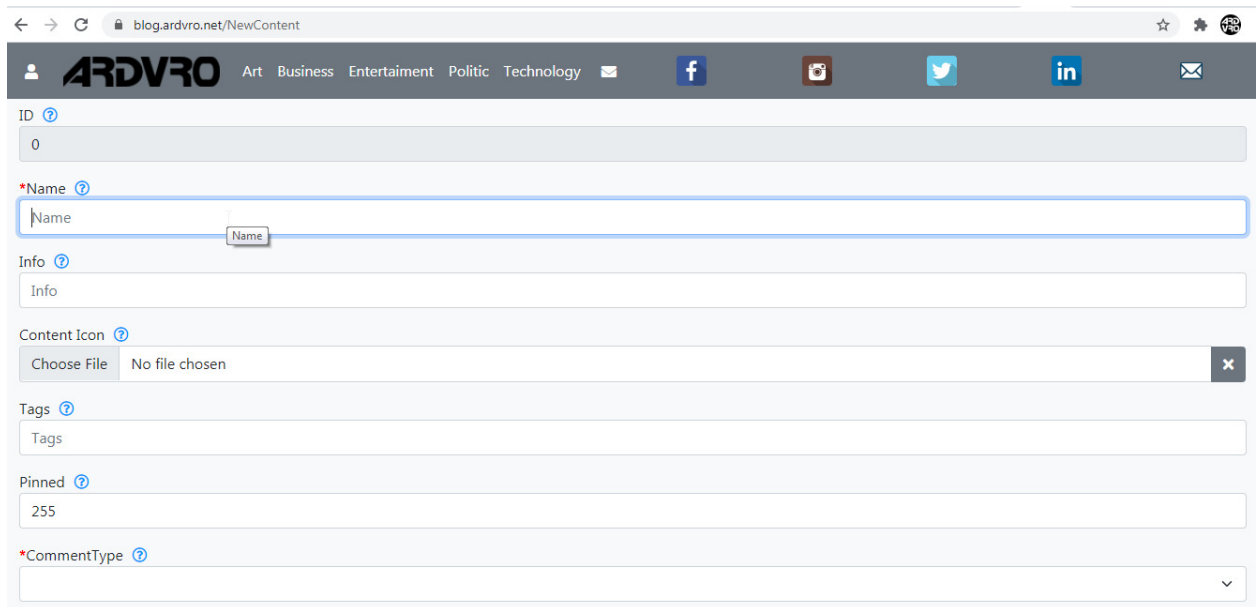

3. First time login you will see an empty tree view.

4. To create new Content, click the "Plus" [+] button on then right.

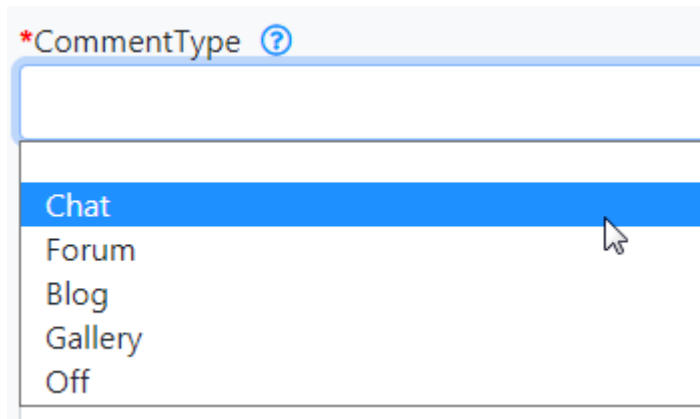

5. First, you need input your content information as shown on the screen below.

The screenshot shows a web browser window with the URL `blog.ardvro.net/NewContent`. The page has a dark header with the ARDVRO logo and navigation links for Art, Business, Entertainment, Politic, and Technology. Social media icons for Facebook, Instagram, Twitter, and LinkedIn are also present. The main form contains several input fields: ID (with a value of 0), Name (with a placeholder 'Name'), Info (with a placeholder 'Info'), Content Icon (with a 'Choose File' button and 'No file chosen' text), Tags (with a placeholder 'Tags'), Pinned (with a value of 255), and CommentType (a dropdown menu). Each field has a help icon (a question mark in a circle).

- ID: is the identifier of each content. If you create a website with WebAppGear, then you need the ID of the your content as the parent forum/content. Get it from here.
- Name: is the title of the content.
- Info: Short description of the content.
- Icon: An image that represent the content, maximum size is 512KB, we recommend less than 256KB.
- Comment Type: You can choose a style to display the comments of the content, you also can set the comment off. If you want to chat online with the other member, select the Chat mode. Gallery will show your comment like on youtube. Blog and Forum will have similar display, like standar forum comment style.

This image is a close-up of the CommentType dropdown menu. The label '*CommentType' is at the top with a help icon. The dropdown list is open, showing five options: Chat (highlighted in blue), Forum, Blog, Gallery, and Off. A mouse cursor is pointing at the Chat option.

6. Status, CmsContentType, Created, Updated, Updater.

7. Chat Widge Script. If you have another website and you want a live chat with your visitors, just copy paste the script on the text box and put it in the <head>...</head> tags. The script will automatically generated after you save this content.

Chat Widget Script

```
const WEBSOCKETURL="https://blog.ardvro.net";
const WEBBASEURL="https://https://blog.ardvro.net";
const CDNURL="https://https://cdn.ardvro.com";
var Route=function route(cfg){this.Items=[]};
window.onload=function(){
  initArdvroChatWidgetForm(11);
};
(function(){
  Loader.InitDependencies(WEBBASEURL,CDNURL,dependencies);
})();
```

8. Editor. This is the body of your content. You can type anything here. You can create a table, bold, italic, color, bigger font, insert image, etc, similar to the word processor application like Microsoft Words. You also can direcly to copy paste from Microsoft Word. We highly recommend that you type first your content on the other applications such as Ms.Word, Notepad, Google Docs, or others, then copy paste it here.

- a. Insert Image from URL. Click this button, then input the image url, then click OK.
